

Nordic Flanges Competitive Edge

 <p>High automation and great flexibility Cost-effective production. Ability to handle both small orders and large container deliveries quickly.</p>	 <p>Risk Mitigation is an important part of the sourcing strategy for many companies and companies are moving production home and acquiring several suppliers. We are a reliable partner for safe material supply</p>
 <p>High availability of raw materials Proximity to our Swedish steelworks is a big advantage both when it concerns availability and cost</p>	 <p>Energy We have 100% green electricity from water, wind and sun and reduce greenhouse gas emissions by 1,000 tons per year compared to conventional energy. Our electricity prices are the lowest in Europe and availability is 100%</p>
 <p>World-class quality Recognized high quality and great confidence in our high and consistent quality among customers and the market.</p>	 <p>Currency advantages The Swedish krona compared to the US Dollar and Euro gives an enormous advantage in export business and is of decisive importance</p>
 <p>Short lead- and delivery times and high delivery precision. Short lead times compared to both EU and Asian suppliers</p>	 <p>Partnership Customers are calling for greater interaction and collaboration than just physical products. Added values that develops the customer's business is expected. We are your Partner!</p>
 <p>Transports to the USA. Container shipping from Sweden to the USA is more cost-effective and more time-efficient than equivalent freights from India and China</p>	 <p>Relationship and collaboration It is easy and straight forward to collaborate with us. We are available when You require it</p>
 <p>ESG Environment, Safety and Governance are mandatory requirements and grows in importance with customers and end users. Use of dirty energy will mean large additional costs for customers</p>	 <p>Flexibility Need of technical change requests or re-planning of orders. No problem, we have You covered at all times!</p>
