

Nordic Flanges GROUP (NFG) REACH commitment

REACH is the European regulation on Registration, Evaluation, Authorization and Restriction of Chemicals. It entered into force on June 1, 2007 with the aim to ensure a high level of protection for human health and the environment from the risks that can be posed by chemicals. Compliance with REACH requires a regulatory evaluation, registration or authorization for chemical substances which are manufactured in or imported to the European Union.

NFG is fully committed to fulfil its legal obligations and is in full compliance with REACH. Nordic Flanges will always work closely with its customers and suppliers in order to meet requirements based in the REACH.

To address its obligations as an importer and downstream user of chemicals, and based on information provided by its suppliers, NFG monitors the [ECHA information on chemicals](#) and implements controls where and insofar as it is required to by law. As such, NFG is committed to the following:

- Retaining accurate chemical data and supplier compliance statements.
- Periodic review of chemical usage and substitution where required.
- Where and insofar as required by law, obtain authorization for the provision or use of chemicals.
- Where and insofar as required by law, notify relevant authorities of chemicals being imported in quantities exceeding stated thresholds.
- Communicate effectively with suppliers and downstream users on the safe use of chemicals.

This commitment will be reviewed periodically and maintained as documented information in the '[Our Policies](#)' section of the NFG corporate website.
