Stockholm November, 2019

Dear customers,

October became one of Nordic Flanges Group strongest turnover months so far 2019! An exceptional performance mainly driven by Ferral Components OY in Kalajoki who delivered a 5 year record breaking month!

Nordic Flanges OY has landed some very interesting OEM-projects with two large Nordic customers. Our foundry in Kronoby is extremely well equipped for casting a wide range of products in addition to aluminium flanges.

Juho Niemi, our sales manager in Finland, represented both Nordic Flanges and Ferral Components at the Alihankinta Subcontracting Trade Fair in Tampere meeting both current and potential new customers.

The weak Swedish currency keeps leading to new export opportunities for Nordic Flanges in Örnköldsvik. Our business trip to USA beginning of July has increased our sales with large wholesalers and OEM customers in USA.

We are making new investments at Ferral Components OY in Kalajoki. A Unisign Unifers 6 C2 – Universal Machining center has been purchased and we expect it to arrive at our factory during week 48. We plan to start first production with the new machine centre during December and to have the machine in full production at the beginning of January 2020. The new machine in combination with a renewed process of current machine park and staff will lead to a 10% increase of capacity in 2020.
