Stockholm October 8th, 2018

Dear customers,

During the end of this summer we installed our new forging furnace at Nordic Flanges AB in Örnköldsvik and I'm happy to announce that it is now up and running. The new furnace has a considerable higher capacity, strongly reduced energy costs and far more environmental than the old furnace.

During September Nordic Flanges Oy and Ferral Components Oy have started an occupational health and safety management quality system in accordance with ISO 45001:2018.

The new ProQ™ pressure-approved aluminum flange has been received with a lot of interest from our customers. Our first major order from one of the leading Nordic wholesalers has been signed and the first shipment to their central warehouse is due this week.

During autumn/winter all three companies within Nordic Flanges Group are going to implement a new ERP system. We are replacing our current ERP system with MONITOR. The implementation process has started and we expect to be fully up and running with MONITOR beginning of February, 2019.

Our strategy and strong ambition to grow our business leads to the need of reinforcement and competence. We are currently looking for new sales men for Nordic Flanges AB, Nordic Flanges OY and Ferral Components OY. More information can be found on our web page (nordicflanges.com).

I look forward to this busy business autumn.

Frederik von Sterneck
CEO Nordic Flanges Group AB (publ.)
